DESCRIPTORS: *Salts, *Solutions, Stability, Temperature, Valence, Solvent action

The influence of various factors on the stability of supersaturated solutions of a number of salts was investigated. An investigation was made of the stability of supersaturated salt solutions as a function of temperature. A study was also made of the effect of the solvent on the stability of supersaturated salt solutions. The results obtained support the assumption that supersaturated solutions are ultramicroheterogeneous systems. (Author)
